

Sell everywhere. Manage once.

One store behind your own website, a shared marketplace
and your shop counter — built for Cambodian merchants.

 Own storefront

 Shared marketplace

 In-store POS

Merchants have tools. None of them connect.

	Facebook page	posts, Live and inbox
	Telegram	customer orders
	Marketplace listing	a second copy of products
	Notebook or Excel	the “real” stock count
	Cash box or POS app	counter sales

Every new channel adds another list to update by hand.

**The last item sells at the counter.
Facebook still says “in stock”.**

Result: an apology, a refund, a lost customer.

Every option today solves one piece

We are not the first. We aim to be the one merchants don't have to stitch together.

Marketplaces

Khmer24 · Smile Shop · VTENH

What works

Bring buyers to listings.

What's missing

Listings live on their platform, separate from the merchant's own brand and counter.

Global store builders

Shopify

What works

Online store and POS in sync.

What's missing

No shared Cambodian buyer marketplace; setup and plans are built for global merchants.

Local all-in-one

Khmun eShop

What works

Marketplace, merchant tools and POS.

Our angle

Closest to our idea. We compete on setup speed, brand-first storefronts and fairer pricing.

Rentify: one store behind every channel

ONE MERCHANT STORE

Products · Prices · Stock · Orders

Entered once. Always the same everywhere.

Own storefront

The merchant's brand, template and link to share on Facebook and Telegram.

Shared marketplace

Buyers discover products from many Cambodian stores in one place.

In-store POS

Counter sales, cash and receipts, using the same stock count.

What makes Rentify different

Three ideas we build on and will prove with merchants

01

Start anywhere, grow without re-listing

Begin as a marketplace seller with no website. Add a branded storefront or POS later — the same products and stock move with you.

02

One sale updates everywhere

A sale at the counter, on the storefront or in the marketplace changes one stock count, so no channel oversells.

03

Fair channel pricing

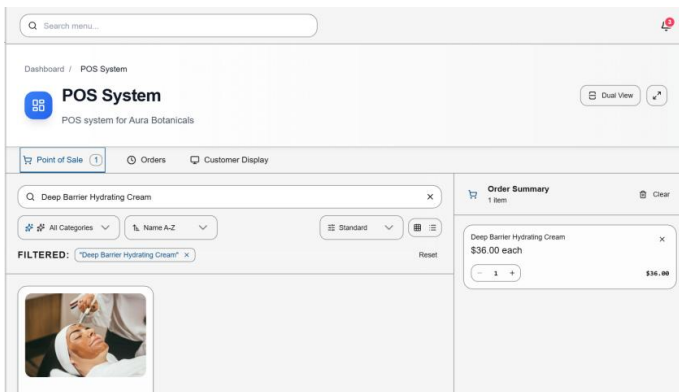

A subscription pays for the tools. Commission applies only to orders our marketplace brings — never to the merchant's own storefront or counter sales.

Working today: one sale, updated everywhere

Aura Botanicals demo store · Deep Barrier Hydrating Cream · starting stock 40

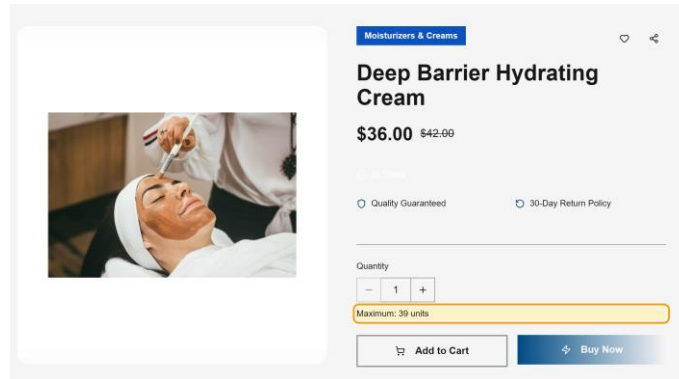

1 Sold at the counter

POS sale: 1 unit, paid in cash

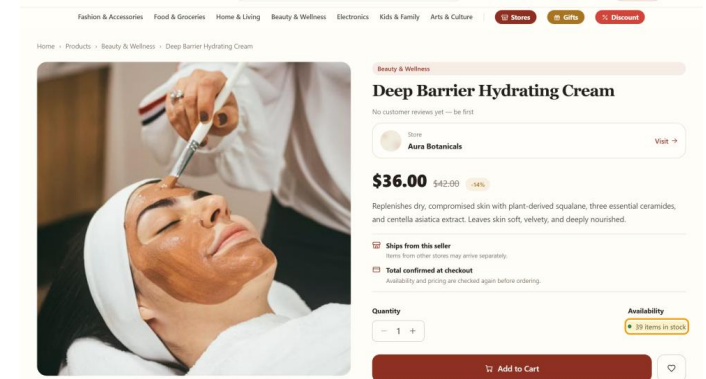

2 Own storefront

Now shows “Maximum: 39 units”

3 Shared marketplace

Now shows “39 items in stock”

40 → 39 on every channel, from one counter sale. No second update.

Who we serve first

The Facebook seller

Sells through posts, Live and inbox.
No shop, or a small one.

HOW THEY START

Starts on the marketplace plus a shareable storefront link.

The small retail shop

Sells at a counter and increasingly online.

HOW THEY START

Starts with POS plus a storefront, joins the marketplace in one click.

BEACHHEAD

Phnom Penh retailers who sell online and at a counter

Fashion · Beauty · Electronics · Home goods

They already have customers, physical stock and a daily sales routine we can observe and improve.

A bottom-up market we can reach

Counted from Cambodia's 2022 Economic Census × US\$60 a year (US\$5 average monthly plan)

TAM **410,600**
retail shops in Cambodia

US\$24.6M / year

SAM **65,400**
specialized non-food stores: fashion, beauty, electronics, home and more

US\$3.9M / year

SOM **≈1,130**
avg. paying merchants in Year 3 (1.7% of SAM)

US\$67.7K / year

ON TOP

Marketplace commission

Not counted here.
Cambodia's e-commerce market was US\$1.51B in 2024.

Facebook-only sellers are largely outside the census — also upside.

How Rentify makes money

A subscription for the tools, plus commission only where our marketplace creates the sale

Starter

\$3 /month

- ✓ Storefront (Khmer / English)
- ✓ Marketplace listing
- ✓ POS for one counter
- ✓ Up to 100 products

MOST MERCHANTS

Growth

\$5 /month

- ✓ Everything in Starter
- ✓ Up to 500 products
- ✓ Sales analytics
- ✓ Up to 3 staff accounts

Pro

\$10 /month

- ✓ Everything in Growth
- ✓ Unlimited products
- ✓ Marketing tools
- ✓ Up to 10 staff accounts

Marketplace commission

A small share of orders the marketplace brings in, deducted when buyers pay online.

0% on the merchant's own storefront and counter sales

Starts with online payments (2027). Rate set after pilot testing.

Launch revenue = subscriptions only

Go-to-market: merchants first, buyers follow

Merchants join for the tools. Their customers bring the first marketplace traffic.

Phase 1 · Q4 2026

10 pilot merchants

- Shop visits in Phnom Penh markets
- Facebook seller groups
- UniPreneur introductions

Phase 2 · 2027

Merchant-led buyers

- Merchants share storefront links
- Referral credit for merchants
- Cross-store discovery in the marketplace

Phase 3 · 2027+

Partners at scale

- SME associations and business desks
- Delivery partner bundles
- Category campaigns (e.g. festivals)

PILOT PASSES IF

7 of 10

merchants still active after 30 days

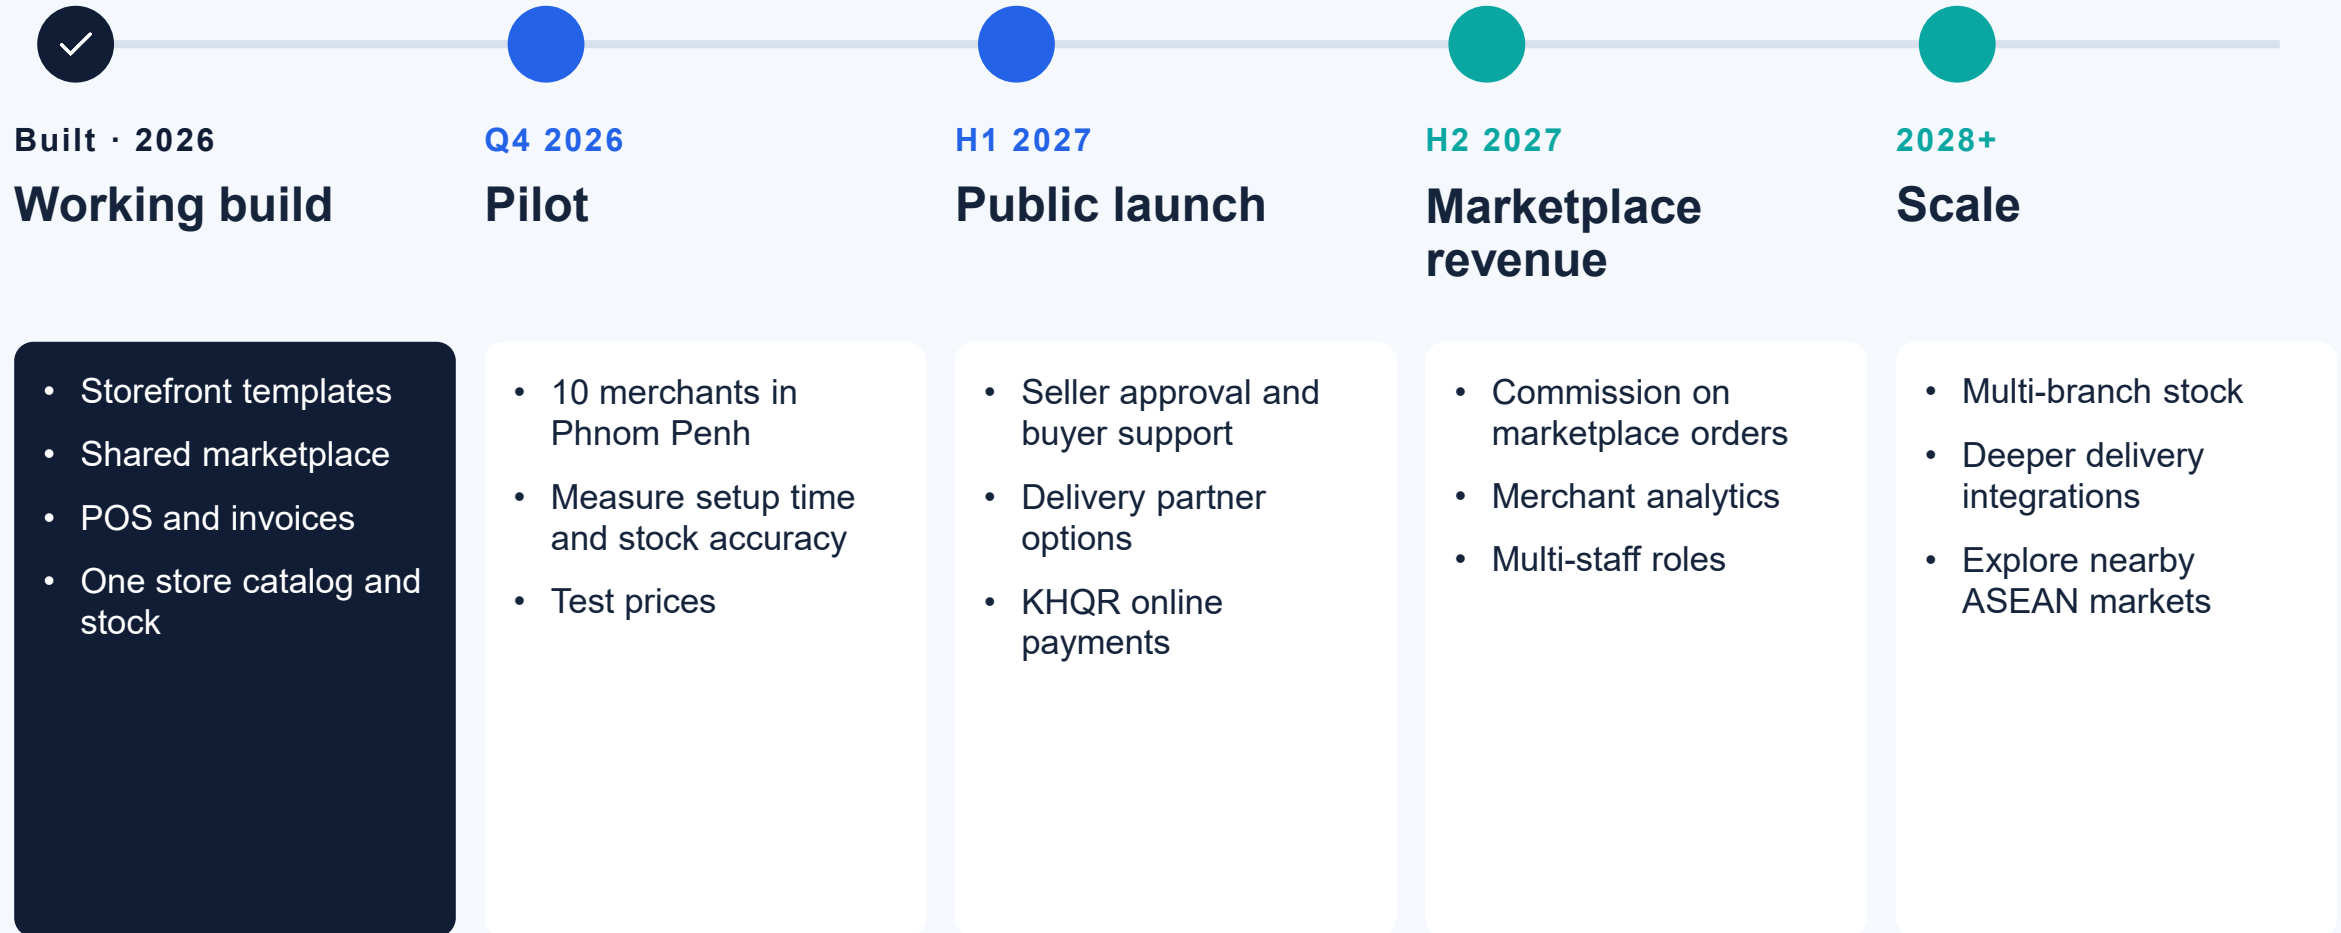

≥99%

stock accuracy across channels

6 of 10

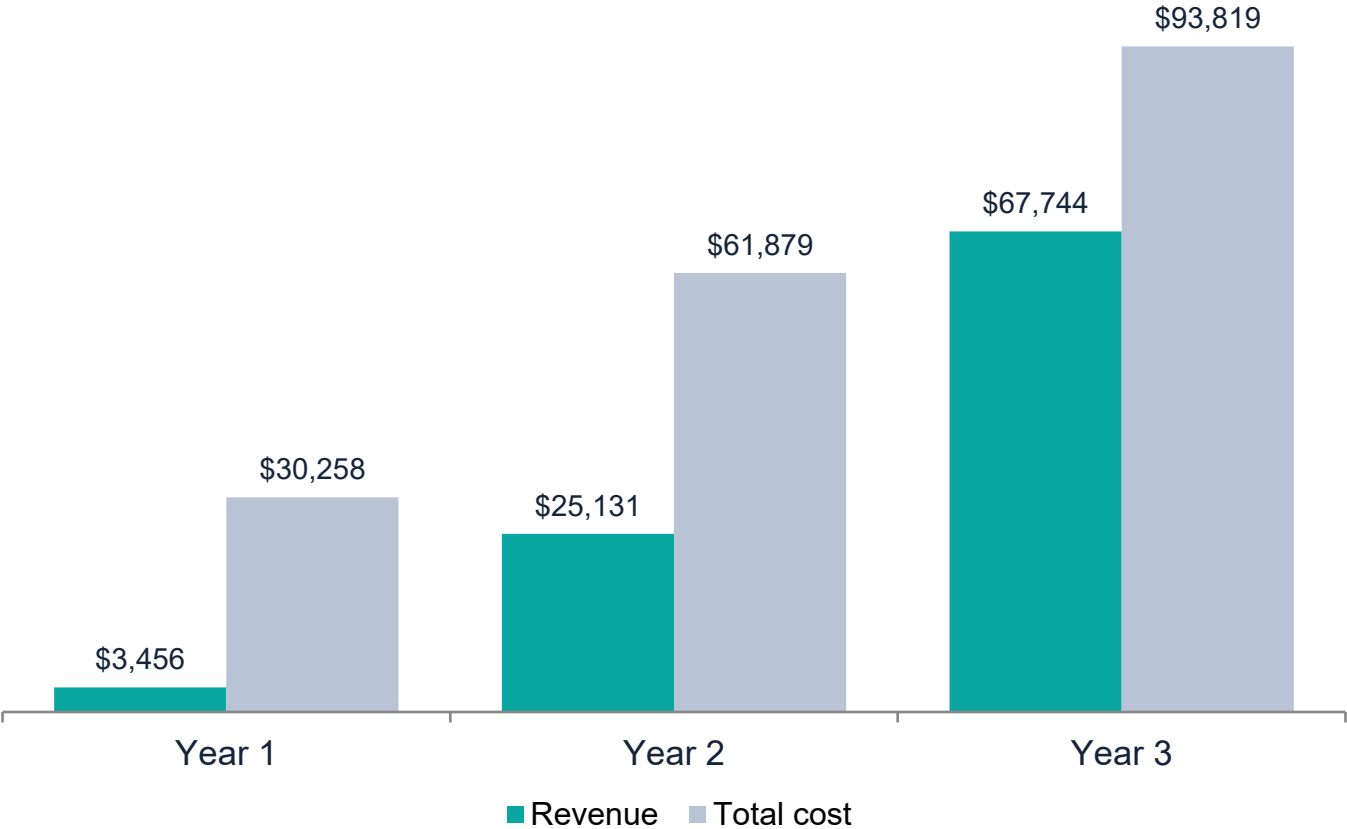

willing to pay a subscription

Roadmap

Three-year projection

Lean scenario · subscriptions only · marketplace commission not included

US\$67.7K

Year 3 revenue

–US\$26.1K

Year 3 net result; losses narrow after Year 2

1,895

paying merchants to break even

US\$5

average plan per merchant each month

Sell everywhere. Manage once.

Rentify — one store behind every way a Cambodian merchant sells.

OUR ASK

10 retailer introductions

shops that sell online and at a counter

Mentors

in retail, payments and marketplaces

Pilot support

to run and measure the Q4 pilot

Appendix

Competitors · Market math · Financial detail · Business model canvas · Delivery partners · Build status

Competitor evidence

Alternative	Publicly described offer	What we compare in pilots
Khmer24	Broad listings across goods, property, jobs and services	Seller workflow for stock and orders
Smile Shop	Multi-merchant app with delivery, payment and returns	Merchant brand and storefront control
VTENH	Marketplace with nationwide delivery, card and ABA payments	Seller terms and total cost
Shopify	Online store and POS with synced inventory	Local fit, setup effort and cost
Khmun eShop	Marketplace, merchant tools, POS and white-label (closest)	Setup time, storefront, stock accuracy

Market sizing: how we counted

	Merchants	Basis	× US\$60 / year
TAM	410,623	All retail establishments, ISIC division 47, excluding fuel stations (4730)	US\$24.6M
SAM	65,433	Specialized non-food retail, ISIC 4741–4774: electronics, clothing, cosmetics, household, books, toys, sports, second-hand	US\$3.9M
SOM	≈1,129	Year 3 subscription revenue (US\$67,744) ÷ US\$60 — average paying merchants in the team model	US\$67.7K

Why not US\$1.51B? That is the 2024 value of all Cambodian e-commerce (Ministry of Commerce). It is market context, not revenue Rentify can capture.

Not counted: marketplace commission, and home-based Facebook sellers, which the census barely captures (only 162 establishments list internet retail as their main activity).

Financial detail (team model, lean scenario)

US\$	Year 1	Year 2	Year 3	Assumption
Subscription revenue	3,456	25,131	67,744	US\$5 average plan across tiers
Commission revenue	0	0	0	Excluded from this scenario (upside)
Cost of service	1,543	8,939	21,669	\$0.30 per active + \$0.75 per paying merchant / month
Gross profit	1,913	16,193	46,074	
Team	20,250	35,300	46,000	Founders, lean hiring path
Sales & marketing	4,110	10,450	16,450	Field onboarding, referrals, paid ads
Software, office, legal	4,355	7,190	9,700	Fixed lean overhead
Net result	-26,802	-36,747	-26,076	No tax while loss-making

Business model canvas

Key partners

Pilot merchants
Delivery carriers
Payment provider (online payments, 2027)
SME associations

Key activities

Build and run the platform
Onboard and approve sellers
Buyer support and moderation

Key resources

One-store catalog and stock
Storefront templates, marketplace, POS

Value proposition

Merchants: sell on their own storefront, the marketplace and at the counter from one store.

Buyers: products from many Cambodian stores with clear seller and delivery details.

Relationships

Assisted onboarding
Khmer and English support

Channels

Shop visits, Facebook seller groups
Merchant storefront links, referrals

Customer segments

Facebook sellers
Small retail shops selling online and at a counter
Buyers in Cambodia

Cost structure

Engineering and hosting · Seller onboarding and moderation · Buyer support · Sales and marketing

Revenue streams

Subscriptions: Starter \$3, Growth \$5, Pro \$10 per month (proposed)
Marketplace commission on marketplace-sourced online orders (from 2027, rate to be set)

Cambodia delivery partner options

Carrier	Publicly described offer	Confirm before pilot
Vireak Buntham	Parcels, tracking, COD, insurance	Routes, prices, remittance
J&T Express	Cambodia parcel booking and tracking	Local COD, returns, insurance
ZTO Cambodia	Domestic parcels; business inquiry	Quotes, COD and data link
Grab for Business	Urban parcel booking and tracking	Area, size limit and COD

What is built and what comes next

Working in development

- Merchant sign-up and one store per merchant
- Store catalog with shared price and stock
- Two storefront templates
- Shared marketplace with seller approval
- POS with cash sales and receipts
- Marketplace checkout with cash on delivery
- Admin console for sellers, products and reviews

Next

- 10-merchant pilot and real usage data
- Production hosting, backups and rollback drills
- Merchant custom domains
- KHQR and online payments
- Marketplace commission and seller payouts
- Restricted-product and returns policies
